

GLOVES MATTER

The Latest From the Team at The Power Gripz

With construction jobsites swinging into high gear, the importance of having durable hand gloves takes center stage. In a recent conversation with the team at The Power Gripz, we found out what they have available and what's new to the industry.

How is business for The Power Gripz?

In a word ... powerful. The Power Gripz has been gripping the industry since the hard launch in 2013. We are honored by how The Power Gripz has been embraced. End users from a variety of industries have found that The Power Gripz is a tremendous solution for many of the day-to-day challenges faced on the job. Each day, more and more teams are adding The Power Gripz to their tool list, and we won't stop until we put a pair of The Power Gripz on every hard working hand.

What has influenced The Power Gripz and its product offerings?

Originally, we set out to develop a superior leather protector—in order to meet the growing and consistent concerns about existing leather protectors. The gloves just didn't provide the grip they needed to perform daily tasks from grabbing tools to keeping a hold on them. We searched for what must be a better answer to this challenge and found there wasn't one—so The Power Gripz was developed.

Logically, we realized that not only could the Utility market benefit from The Power Gripz proprietary grip but any pads and design. The industry depends on ultimate protection,

maximum comfort, and enhanced safety in the gloves they wear. As a result of our R&D team and feedback from end users, The Power Gripz offers a complete line of work gloves ... from our basic unlined to cozy and comfortable Thinsulate-lined to KEVLAR Category A4 CUT RESISTANT and, of course, the FWR/CUT RESISTANT WORK GLOVE (fire water and cut resistant).

What benefit does The Power Gripz offer contractors?

The Power Gripz Work Glove Series includes many options that will help meet the challenges of any job. The all-leather series offers naturally abrasive resistant leather work gloves in Unlined, Kevlar-lined (ANSI/ISEA 105-2016-A4 cut resistant), and Thinsulate-lined. All of the leather work gloves are 40cal/CM2 and are stitched with Kevlar thread for strength. The entire line of all leather work gloves feature a leather gauntlet and can be

ordered with an additional Kevlar or knit cuff to keep debris from falling into the glove. The Power Gripz proprietary grip pads and palms help keep hold of tools and help to keep drop zones safer. The durable yet flexible leather provides unparalleled hand protection without compromising dexterity.

Are there new offerings from The Power Gripz?

We launched the FIRE WATER AND CUT RESISTANT work gloves in late 4th quarter 2016. This insulated work glove is made of the finest materials available and is designed to provide FR protection, as well as durability and comfort in all weather conditions. Arc Rated, Flame Resistant, Water Resistant and Cut Resistant (ANSI/ISEA 105-2016 Classification A4; ASTM F 2992-15), and ANSI/ISEA Section 5.1.2 puncture category Level 3.

And, for 2017, the Mechanic Style work gloves are being added to The Power Gripz line of work gloves. These mechanic style gloves fit close to the hand. The Power Gripz Mechanic Style work gloves keep your hands protected while providing the utmost dexterity for maximum comfort and productivity. The Power Gripz Mechanic Style work gloves are available from the basic to the cut resistant and FR qualities.

Closing thoughts?

The Power Gripz has you covered when it comes to work gloves—there is something for every job and for every preference. So, no matter what your hand protection needs, The Power Gripz has the perfect fit. ■

Getting a Grip on Hand Protection

The Latest from THE POWER GRIPZ

Having the proper hand protection for the demands of the jobsite is an important safety element. Let's take a closer look at The Power Gripz and its products.

The Power Gripz has made a huge impact in the industry; what is the brand most proud of to date?

The Power Gripz was developed to answer a loud and constant call from end users. Before The Power Gripz launch in 2013, existing leather protectors did not provide the grip needed to accomplish tasks quickly and effectively. Most amazing is that for more than a century the "big names" in the industry never addressed the concerns, listened to the feedback, or understood the end users challenges. For more than 100 years—nothing changed! THE POWER GRIPZ changed all that, bringing innovation and a solution to the industry, and more importantly to the hard-working end users.

“BECAUSE SAFETY MATTERS TO EVERYONE
... GET A GRIP!”

What benefit does The Power Gripz offer contractors?

The Power Gripz Team is a resource for its customers. Customer-focused service is always the goal. The brand offers hand protection in a variety of styles and options, so that the entire crew can find the right glove for the job. The Power Gripz is the glove or protector that gives workers peace of mind for a productive and safe day (or night) on the job.

From The Power Gripz High and Low Voltage Leather Protectors, the complete line of all leather, highly durable work gloves to the mechanic style series of work gloves—The Power Gripz has you covered for hand protection.

Are there new offerings from The Power Gripz?

The Power Gripz is launching its GEN 3 series to great fanfare. The Power Gripz team strives to utilize end users valuable feedback to produce tangible enhancements that

continue to make the brand the choice of more laborers every day. TPG3 is sure to do that! The Power Gripz is proud to be the first to offer the highest quality cut resistant leather protectors in the industry, as this is now a top-of-mind safety issue. The vision of the company is to always look forward and continue to innovate to the benefit of the end users. Just as The Power Gripz provided the protector innovation in 2013, the cut resistant protector has been received with tremendous enthusiasm.

Also new to launch are the 13-inch climbers, a solid climbing glove that is also a great work glove choice, with a durable gauntlet for forearm protection. This style is offered in Goat Skin, in both an unlined and a Kevlar lined category A4 cut resistant option. The new DRIVER STYLE WORK GLOVES are a sensation. These soft, durable gloves are offered in Goat Skin and are the perfect go-to-selection for almost every job.

The desire to be a solution and a resource for customers is the reason that The Power Gripz engages in relentless efforts to innovate and why the company is diligent about perpetual research and development in order to try to improve and enhance its products.

Closing Thoughts?

The Power Gripz strives to give the end users, as well as safety directors, foremen, and the entire crew increased confidence on the job, enhanced safety, and maximum protection. There is a Power Gripz Protector or Work Glove that is a perfect fit for most every individual preference. The goal is to keep those that are working hard, safe and satisfied. The Power Gripz offers a solution for every job. No matter what your hand protection needs, The Power Gripz has you covered. ■
